

CAREER OBJECTIVE WORK EXPERIENCE

Data Analytics • Internship

Nov 2025

Deloitte, Virtual

- Collected and organized data using Excel and other analytical tools.
- Prepared reports and dashboards to present key findings to the team.
- Analyzed business data to identify trends and support decision-making.

EDUCATION

Master of Science (M.Sc), Mathematics

2021 – 2023

University Of Gour Banga

Percentage: 76.08%

Bachelor of Science (B.Sc), Mathematics

2018 – 2021

Malda College

Percentage: 80.38%

Senior Secondary (XII), WBCHSE

2018

Science

Lalit Mohan Shyam Mohini High School

Percentage: 85.20%

Secondary (X), WBBSE

2016

Harirampur A.S.D.M High School

Percentage: 77.86%

TRAININGS / CERTIFICATIONS

Data Science

Jan 2026 – Present

Internshala, Virtual

- Introduction to Data Analytics
- Data Management and Analysis with MS Excel
- Data Visualization (Power BI)
- Python for Data Analysis
- SQL for Data Analysis
- Machine Learning Fundamentals
- Natural Language Processing
- Deep Learning

PORTFOLIO

[GitHub link](#)

PROJECTS

[Financial Risk Analysis with Python ↗](#)

Aug 2026 – Sep 2026

- Developed a Python-based financial risk analysis tool using customer transaction data, applying data cleaning, segmentation, and anomaly detection to identify risk patterns.
- Created data visualizations to highlight transaction trends, overdraft behavior, and key financial risk indicators.

[Predictive Modelling on a Web Scraped Data with a Power BI Dashboard ↗](#)

Sep 2026

- Built an end-to-end predictive modeling pipeline in Python, including web scraping, data collection of 1,000+ records, data cleaning, preprocessing, and model development.
- Evaluated predictive models and integrated the results into an interactive Power BI dashboard to communicate insights and support data-driven recommendations.

[Retail Customer Retention Analytics ↗](#)

Apr 2026

- Built a Customer Retention Analytics Dashboard in Power BI, integrating customer demographics, transactions, loyalty, and store performance data using Power Query, calculated columns, and DAX measures to analyze churn, purchases, and CLV.
- Delivered data-driven insights to identify churn patterns, evaluate loyalty program effectiveness, and recommend strategies to improve customer retention and engagement.

SKILLS

- | | | |
|------------------------|-------------------------------------|------------------------|
| • Data Analysis | • Data Analytics | • Data Visualization |
| • MIS | • Power BI | • MySQL |
| • SQL | • ETL processes | • Python |
| • Statistical Modeling | • NumPy | • Pandas |
| • Matplotlib | • Seaborn | • Machine Learning |
| • Data Science | • Natural Language Processing (NLP) | • Predictive Analytics |
| • Deep Learning | | |

[Market Basket Analysis with Python ↗](#)

Sep 2026

- Performed Market Basket Analysis and customer segmentation on e-commerce data using Python to identify purchasing patterns and customer groups.
- Generated actionable insights for product recommendations and marketing strategies by analyzing customer behavior and purchase trends.

[Logistics Optimization for Delivery Routes ↗](#)

May 2026

- Designed and optimized a SQL-based logistics analytics system to improve route efficiency, identify delivery bottlenecks, and enhance shipment performance.
- Performed data cleaning and preprocessing, then applied advanced SQL techniques (CTEs, subqueries, aggregations, and window functions) to generate actionable operational insights.

[Spotify social media performace data ↗](#)

Feb 2026

- Analyzed Spotify's social media data across platforms to evaluate engagement, content performance, hashtags, follower growth, and campaign effectiveness.
- Built an Excel-based Social Media Intelligence solution to identify high-performing content and platforms, optimize marketing spend, and provide data-driven recommendations.
